

Environmental Policy

Scomac Services will:

- advise all our employees and direct contractors about this policy, and the reasons for it
- comply with relevant environmental legislation, notably the 'duty of care' for waste disposal and the "special waste" regulations
- seek to establish, before arriving on-site, if the client has any specific environmental requirements, for example for the control of pollution or the recovery of materials
- continually seek to increase the reuse or recycling of the materials used in our operations, where this is financially practical for our business
- advise all company drivers about the need for fuel-efficient driving, and record annual company mileage and petrol consumption
- To further help reduce the environmental impact of carbon dioxide emissions we will advise our clients about options for using energy efficient equipment and fittings, where installation is technically possible

This policy will be reviewed annually.

Signed

David Scott
